

ABILITY CCS Retail Cloud Platform helps you manage your multi-channel retail activities using cloud technology with a centralized database. This ensures real-time data access across all channels.

The ABILITY CCS for BigCommerce Connector is fully built into CCS delivering a real-time, native integration using APIs, no additional software needed.

Automated synchronization of orders, inventory, purchasing, accounting, customers and pick, pack & ship makes for a seamless customer experience and maximized back-office operations.

Designed, developed, and supported by Ability Commerce.

ITEMS

Regular items, dropship, styles and kits are downloaded from BigCommerce into Ability CCS.

PRICE CHANGE

Price updates processed in CCS are uploaded to BigCommerce.

ORDERS

Web orders placed in BigCommerce are imported to CCS. Any changes made in CCS are then sent back to BigCommerce, including order status.

SHIPMENT & DEPOSITS

Package and shipment data processed in CCS is sent to BigCommerce. Deposits are done in CCS.

RETURNS

Returns made to BigCommerce web orders are processed in CCS and sent to BigCommerce.

CUSTOMERS

Customer data originating in BigCommerce is uploaded to CCS.
